

Pipe.

Made from extruded aluminium and a versatile addition to any interior environment, the sculptural Pipe collection includes a pendant and table light.

With contrasting textures the interior is coated in anodised metallic colours giving a soft shimmering glow whilst the exterior is powdered coated to give the shade a smooth finish. Both pendant and table versions are available in two colour combinations; black exterior with gold interior and off white exterior with lilac interior.

The Pipe Pendant shade can be rotated upon installation to provide the required directional light. The Pipe Table exudes a bright light ideal as a desk or table light.

Pipe Light

Extruded aluminium light. Exterior powdered coated, interior in metallic anodised colours.
