

PRODUCT DESCRIPTION – THE STORY

Some years ago the British Tea Council asked BODUM® to develop a new way of brewing tea. We set a lofty goal for ourselves: we wanted our new teapot to respect the delicate nature of tea and bring its richest flavors to full bloom. And we wanted it to be even easier to use than tea bags. The success of the ASSAM Teapot suggests that we might have reached it. The tea press system is a surprisingly simple brewing system that gives any tea the optimal time and space to develop its rich flavor bouquet with the plunger interrupting that process at the preferred time with one little push. The ASSAM Teapot comes with a spacious stainless steel filter where tea leaves swirl freely in order to release their stimulating qualities. When the infusion time comes to an end, the push of the plunger encapsulates the pressed tea leaves at the dead end of the strainer and the brewing process is stopped. The 0.5l/1.0l ASSAM is made from borosilicate glass – an outstanding material, as it's light and strong and absolutely neutral in taste. The collar around the filter is made from silicone, which provides a perfect fit between teapot and filter and protects the glass from being scratched. The silicone collar is also heat-resistant – your fingers are protected when you remove the filter.

KEY FEATURES & BENEFITS – AN OVERVIEW

Capacity 1812 0.5l/17oz

1805 1.0l/34oz

Measurements 1812 117x158x124mm / 4.6x6.2x4.8in

1805 142x 198x148mm / 5.5x 7.7x 5.8in

Packaging type Giftbox

Pieces per sales unit 1

Unit per master carton 6

Material Borosilicate glass, Stainless steel, Plastic, Silicone

Dishwasher safe Yes

Microwave safe No

Induction No

Ovenware No

Freezer No

Availability Already available
