thanks to an accessory, Supergiù can colour the emission of the indirect light towards the ceiling: the environment thus takes on an unexpected chromatic shading of great scenic effect.

the suspension system of the appliance also fulfils both the function of "centred" and "decentred" installation in the case that the light point is not above the area to be illuminated.

materials

anodised or painted aluminium reflector

diffuser

alu	white	black	amaranth

filters

orange	green

(*) Note: D59 F and D59 HQL versions require functional earthing
