

SFP6104TVN

linea

60cm "Linea" Pyrolytic Multifunction oven with Touch Controls and Soft Close Door, Black
Energy rating A+

EAN13: 8017709255374

Special promotion on this model* 5 year guarantee on parts and labour if purchased by 30th June 2019. Models included are all Linea ovens & Combi appliances. Terms and conditions apply. At selected displaying retailers only. [For full terms and conditions please click here](#)

- Interactive touch control Easy guide colour LCD display
- 50 automatic programmes
- 10 customisable recipes
- Other functions: Defrost by time, Defrost by weight, Plate rack/warmer, Proving
- Other options: SmartSense system, Keep warm, Eco light
- Quadruple glazed removable door
- Removable inner door glass
- Electronic controls with child lock
- Soft close door
- Air cooling system
- Closed door grilling
- Pyrolytic cleaning
- Easy clean enamel interior
- Rapid pre-heating
- Energy saving option - Ecologic
- Metal side supports
- 5 cooking levels
- 2 x Halogen lights

STANDARD ACCESSORIES:

- 1 x extra deep trays (40mm deep)
- 2 x roasting/grill pans (20mm deep)
- 1 x set of telescopic guides – Total extraction
- 1 x chrome shelf
- 1 x Grill mesh

- Oven GROSS capacity: 79 litres
- Oven NET capacity: 70 litres
- Usable cavity space dimensions (HxWxD): 360x460x425mm
- Nominal power: 3.0 kW
- 13 Amp power supply required

NB: This model supersedes the SFP140NE

Functions

Main oven

Options

- **GT1T-2** - Pair of fully extractable telescopic guides
- **PRTX** - Pizza stone with handles
- **PALPZ** - Folding Pizza Shovel
- **GT1P-2** - Pair of partially extractable telescopic guides

Main oven

Circulaire with upper and lower elements:

The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.

Circulaire:

The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.

Circulaire + grill:

Circulaire + grill

Fan with upper and lower elements:

The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.

FAN WITH LOWER ELEMENT/ CIRCOGAS:

In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning. In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time.

Upper and lower element only:

A traditional cooking method best suited for single items located in the centre of the oven. The top of the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.

Lower heating element only:

Ideal for foods that require extra base temperature without browning, e.g. pastry dishes, pizza. Also suitable for slow cooking of stews and casseroles.

Fan with grill element:

The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

Grill element:

For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.

ECO:

The combination of the grill, fan (if present) and lower element is particularly suitable for cooking small quantities of food.

Pyrolytic:

Pyrolytic cleaning at 500°C destroys all the dirt deposits inside the oven. The process can be set from 1.5 hours to 3 hours, depending on the degree of dirt build up.

**Pyrolitic:**

The Eco pyrolitic cleaning function can be selected when the oven has a lighter build up of dirt. This function has a maximum duration of 1.5 hours.
