

by José de la O

Inspired by the traditional flycatcher and its natural and harmless way to eliminate flies, José de la O has designed the Firefly pendant for Mater. It inspires to hang in different heights and formations in a room and with its hidden LED light source resembles its origin as a hanging object with reflections. The Firefly Lamp is a modern interpretation of how to avoid the use of pesticides on our planet.

The LED choice of light source honours the UN Sustainable Development Goals of “Affordable and Clean Energy” (SDGs 7) and “Partnership for the Goals” (SDGs 17).

Item no.

02401 Firefly — Copper

02411 Firefly — Black

Material

Steel and glass — partly sandblasted

Finish

Copper or Black plated top

Light Source

GU10 — LED Max 9W

Bulb included

Origin

Europe

Dimensions

Ø 108 mm H 475 mm
