

NEW SUSTAINABLE KITCHEN UTENSILS

LESS PLASTIC, MORE FLAVOUR IN THE KITCHEN

Vegans, vegetarians, flexitarians, pescatarians and meat-eaters: Welcome to the green kitchen! What you put on your plate is not that important. But how it tastes is paramount. Eva Solo's new Green tools series comprises functional and sustainable utensils that will help to bring out all the flavours in all the wonderful vegetables. With the flavour grinder and citrus squeezer, for example, it is much easier to make the condiments that add flavour to your salads and vegetables. And eating more flavourful food will satisfy your hunger faster.

All the handles in the series are made of a sustainable material in which 50 per cent of the plastic has been replaced by wheat fibre. The Green tools are thus a tribute to new green habits in the kitchen as well as new and sustainable production methods.
