MAINTENANCE OF METALS & CORDS

Some of the metals in the Frama collection are left untreated to allow for a natural patina to develop over time. See below to keep these beautiful signs of aging, or polish them away. All collection pieces are for indoor use.

CLEANING POWDER COATED/ELECTROPLATED METALS:

To clean powder coated and electroplated lighting, use a soft brush (non abrasive) or cloth, and a mild household detergent solution to remove dust, salt and other deposits. Then use a clean, soft cloth to dry the piece. Never use harsh detergents.

TEXTILE CORDS:

Avoid contact with liquid and cleaning soap. Use a brush or cloth to remove dirt from the textile cord.

Avoid direct sunlight and sharp items.

Do not cut the textile cords by yourself, let a licensed electrician perform length adjustments.
