

On its own or with its two sisters, it enchants and excites with plays of colour and light once turned on, the transparent polycarbonate enhanced by a myriad reflections. Easy is a cylindrical suspension lamp characterised by refined matching of the different transparent and sanded polycarbonate finishes. It can exist on its own or in a “cluster” of three. The designer has carefully worked the chromatic combinations according to cold or warm tones. It is packaged singly or in a master box of three, with one of each shade.
