A sofa that is equally comfortable at home as in the office.

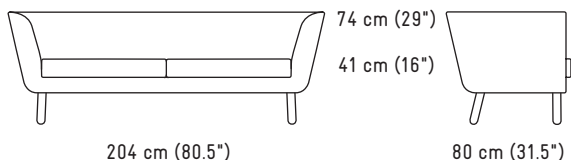

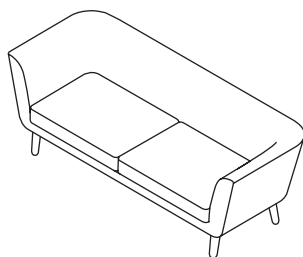

Designer Jesper Ståhl focuses on the details with his new family of upholstery furniture called 'Nest'.

The absence of cushions creates a focus on the sofa's profile and its stitching.

"I wanted to design a sofa with an inviting corner that one can creep up in, almost like a bird in a nest,"

Jesper Ståhl explains. "But it was important that the sofa and easy chair should look good from all directions and that is why they slope and are rounded towards the bottom."

With its strong pine frame, its upholstery that can sustain more than 100 000 on the Martindale rubbing test (where 35 000 Martindale is considered fully adequate for use in public spaces) and its generous height above the floor making it easy to vacuum clean, Nest is clearly well designed in the full sense of the word.

Specifications

Legs	Solid ash.
Frame	Solid pine + laminated wood.
Seat	High resilience foam 35 kg/m ³ , upholstery foam and non-woven fabric.
Back	Foam 28 kg/m ³ , non-woven fabric.
Fabric	(Sand, grey, pink, turquoise): 18% polyester, 10% linen, 57% viscose, 15% cotton, 420 g/m ² . More than 100.000 Martindale. (Dark grey): 67% wool, 26% nylon, 7% polyester. 370 g/m ² . More than 100.000 Martindale.
Weight	44.0 kg (97 lbs)
Features	The upholstery can easily be removed for washing.
