## PRODUCT DESCRIPTION – THE STORY

---

If part of the reason you're having coffee is the foam crowning your latte or cappuccino, you might want to keep this little super tool handy. The CHAMBORD milk frother foams up your milk in no time – unplugged! Just pour cold milk (skim, 1 or 2% fat) in the glass jug and move the plunger up and down a few times. You're rewarded with the most luscious foam imaginable. If you like your foam hot, just put the glass jug with the foamed milk into the microwave for about 30 seconds. The jug is made from borosilicate glass, which is sturdy and light at the same time and doesn't cloud – even after years of dishwasher use. The plunger is made from stainless steel and plastic, and it is dishwasher safe as well.

## KEY FEATURES & BENEFITS – AN OVERVIEW

---

**Capacity** 0.08 l, 2.5 oz

**Measurements** 75 x 79 x 185 mm/2.9 x 3.1 x 7.2 inch

**Packaging type** Giftbox

**Pieces per sales unit** 1
