

alwa by Sebastian Herkner

Sebastian Herkner wanted to create glass in a new way, something solid and unique. He is fascinated by casted glass. Compared with mouth-blown glass elements, which have a specific wall thickness, Alwa tables have a tabletop made of 50 mm casted glass. The liquid glass is left in a special metal mold to solidify for several days. The air bubbles in the glass give each tabletop an unique character. The appearance mimics the aesthetic of water.
