

# CLOUD

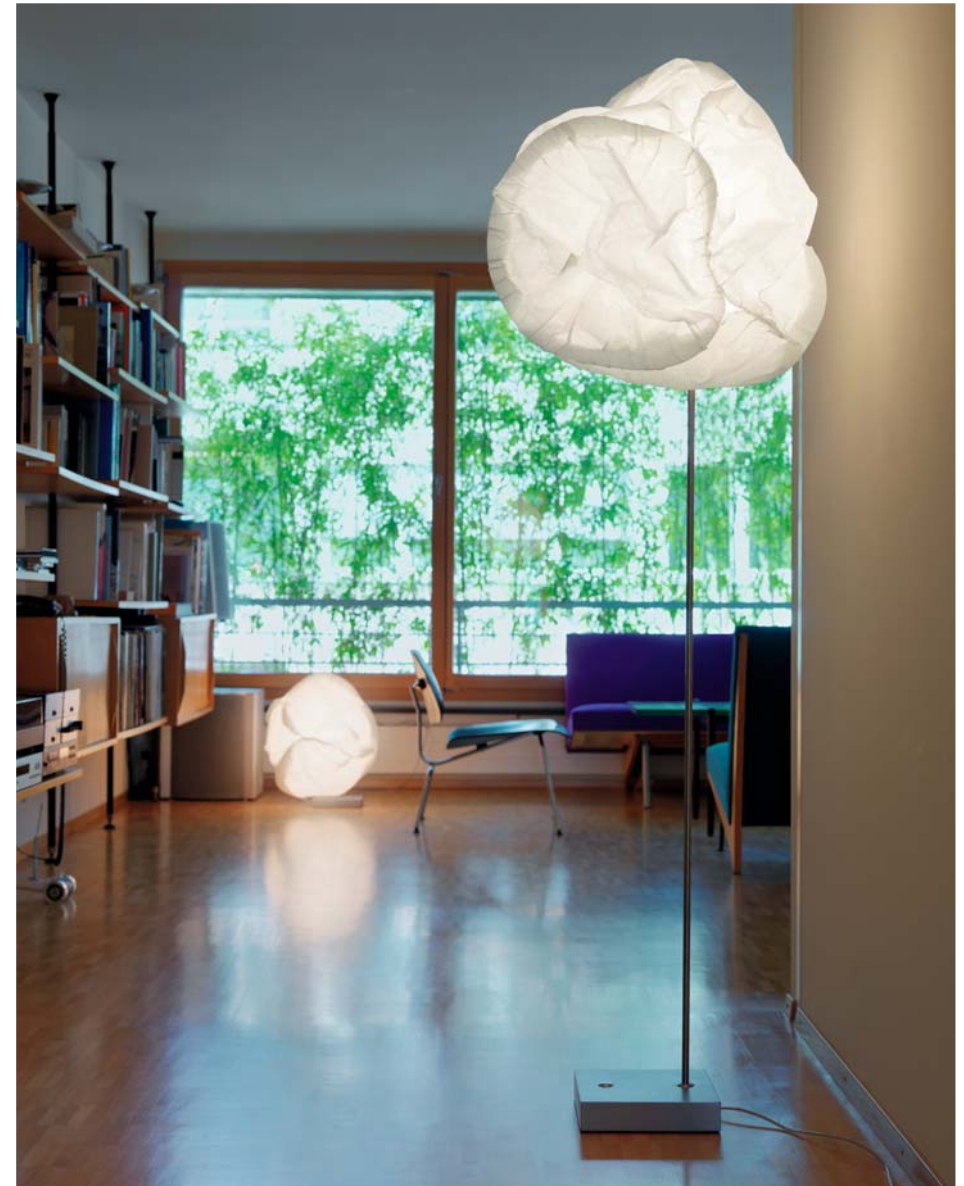

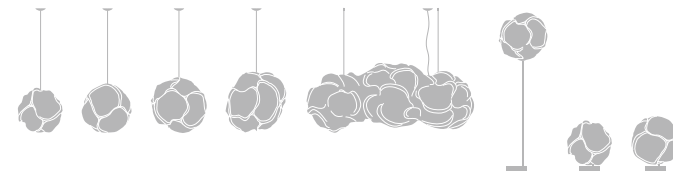

Frank Gehry, 2005

Verformbar  
Material praktisch reissfest, schwer entflammbar und alterungsbeständig  
Modularer Aufbau durch Schalelemente

Details siehe Seite 120

Mouldable  
Material virtually tear-free, flame resistant and durable  
Modular structure comprising shell elements

For details refer to page 120

# CLOUD

Frank Gehry, 2005

CLOUD besteht aus mehreren zusammengesteckten Schalenelementen, welche sich durch Ausbeulen oder Eindrücken verändern lassen. Aufgrund des modularen Aufbaus sind neben den Standardgrößen auch Sonderanfertigungen möglich. Als Material kommt ein mehrfach veredeltes Polyesthervlies zum Einsatz, welches praktisch reissfest, alterungsbeständig und schwer entflammbar ist.

CLOUD comprises several plug-in shell elements, which can be changed by bulging or indenting. As it has a modular structure, custom-made designs are available in addition to the standard sizes. The used material is a polyester membrane that has been made flame-resistant, durable and virtually tear-free through various refinement processes.

Material: Polyesthervlies  
Kabel transparent  
Bauseits dimmbar  
Für Stromschienen geeignet  
Material: polyester fleece  
Cable transparent  
Dimmable on site  
Suitable for contact rail
