

13EIGHTY

By Scholten & Baijings

HAY

HAY's 13Eighty chair designed by Dutch designers Scholten & Baijings is aptly named after the number of tiny holes in the moulded polypropylene shell. These perforations create a characteristic aesthetic, where transparency and a play of light and shadows add to the chair's expression, while the variations in the sizes of the holes bring a sense of movement to the visual appearance. They also have a functional use in draining rainwater off when the chairs are used outdoors.

Available in a variety of designs, with or without armrests and stackable. 13Eighty is a versatile chair with possibilities for both indoor and outdoor contexts.
