

# BOX SYSTEM

The Mater Box System is a storage solution with endless possibilities. The boxes are hand crafted from sustainably harvested Indian mango wood with a lead-free, water-based PU lacquer that respects the local environment. The system consists of boxes in a variety of sizes and three different finishes. The boxes can be arranged as room dividers, side tables or wall mounted for shelving set ups.

Indian mango wood is sustainably and responsibly sourced timber - once the productive life of the tree is over another one is planted to replace it. The finish on the wood is a lead free water based clear PU lacquer that respects the local environment.
